Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art did not teach or suggest a display unit comprising: a substrate provided with light-emitting devices and inter-device wiring in a display region, an opposed substrate with having a black matrix forming a pattern to cover at least the inter-device wiring, and a sealing adhesive resin charged and filling the space between the two substrates in the condition of sealing the light-emitting devices. Eida et al. (U.S. 5,909,081) did not disclose an adhesive resin filling the space between the substrates. Nishi et al. (U.S. 6,624,570) did not disclose a black matrix covering the display wiring. Providing such a black matrix would not have been obvious because it would have caused the display pixels to be blocked. Furthermore, the prior art did not teach or suggest aligning two substrates after adhering them via an adhesive resin, but before the adhesive resin is cured, as recited in claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
